

CASE STUDY

PLATFORM: Northrop F-5 / T-38

PROGRAM: F-5 Anti-Skid Braking

PRODUCT: Anti-Skid Kit for F-5

PROBLEM: Most F-5 aircraft do not have Anti-Skid brakes

SOLUTION: COC & Crane Aerospace Team introduces new Kit

Safety First when it comes to landing a high performance aircraft like the Northrop F-5. With typical landing speeds of 150 knots, the COC – Crane Anti-Skid Braking Kit is cost effective and easy to install. Overall weight of components is under 10 lbs.

The Anti-Skid Kit contains all the components and hardware required. COC's easy to follow Work Instructions and installation templates enable technicians to install the system quickly and correctly.

This Anti-Skid is comprised of the same components as the F-18, ensuring spares and service for the lifetime of the aircraft.
